FRANCHISE OPPORTUNITY

Interested in becoming part of our Franchise? Other companies are charging €40,000 or more for this service.

For a limited time, we are offering equipment and full training of refill machines.

An easy and profitable business where running costs are low and return high.

18 reasons why you should join our team

1. It's a very profitable successful business
2. A Once in a lifetime opportunity
3. Very low start-up and low running Costs
4. High standard of the latest equipment. In fact, much of the equipment we supply, you just can't get from anywhere else.
5. Protected Cachment Areas Guaranteed. No need to worry about other 9to6 franchises in the same area.
6. Stable and Loyal Customer Base. When customers see how low our prices are, they tend to return again and again
7. Low Staffing Requirements. You need far fewer staff than you would need in a restaurant.
8. You can buy products from us, at much lower cost than so many of our competitors charge from their franchisees.
9. Easy to run business. No running around, No stress. Easy to manage. No problems
10. We like to build our relationships based on trust and mutual respect. We will help you, and work with you to build your dream
11. Business is Booming! We are expanding across Ireland and the UK, and hope to have our first international stores outside Europe within the next year.
12. We take pride in what we do, and set high standards for ourselves and the quality of our products.
13. We ask you for very little. You will have a working, dependable, trustworthy and profitable business but without the back-breaking financial burden that other franchise companies would place on you. We would rather not tax your entrepreneurship like other franchises would do. Instead, we prefer you can start with the minimum of capital, and our focus is more on supplying you with a powerful business, which is beneficial to all of us
14. We will assist you, and train you for free on how to operate our unique Ink stations. We will train you on every aspect of the business, in way that is tailored to your needs and experience. We will supply you with everything you need to get your franchise business started.
15. Be your own boss. Be the owner of your very own 9to6 franchise store. Have financial independence and financial freedom.
16. We are friendly and approachable, and we are available to call anytime you wish
17. We are working on a package of incentives and exciting rewards for high sales.
18. No experience necessary. You don't need to have any prior sales experience.

Join us and become part of our franchise and we will offer you 5% commission for every successful candidate that you introduce to us and joins our franchise. Offer is only for our members.

20. The above areas all in backend module accessible to administrators.
21. Full administration manual included

9to6 Franchise Opportunities

We are excited to be able to offer you genuine franchise opportunities for the 9to6 brand. Our business began about 4 years ago, with a city centre novelty and gift store in Ireland, but expanded into a fully fledged Print and Media store. Business and revenue growth has been enormous, and we are looking for expansion partners to help us expand our operations into greater Europe.

We now sell a range of diverse products, from Printers, Ink Cartridges, Toners, Computer equipment, Photo Paper, DVD Media, to our own brand of Printer Cartridges, as well as popular products such as Flash Cards, RAM, USB cards, USB Memory MP3 Players, Digital Video Cameras, etc. We also clean and refill inkjet cartridges, with our specialized equipment that puts us ahead of our competitors. Our Print business is also booming - we do everything from Colour Photocopying, Tee-Shirt Printing, and Posters to Large Digital Printing. We are not offering the full set of products in our franchise, just the most profitable core product range, cartridges and refills.

We can offer you a business that has a very high growth potential. So high that we have had to double our staff to keep pace with the fast rate of change happening. We have strong, dependable sources of quality products from around the world, which are contracted to supply us with products at extremely good rates. It is those rates, which give us such a highly competitive edge, and it is also one of the many reasons why this is such an exciting franchise potential.

We will be introducing special growth rewards for high sales. We believe that your success is our success, and therefore we have set our focus on making our business a low entry cost, high profit making business so that you can achieve your dreams of running your own store. As your dream becomes reality, so does ours. Your success is our success.

We supply the Ink Cartridges, Cleaning, Refilling Machines, and a host of excellently priced products to you, if you should feel like you could handle the challenge. Our product range includes various Paper and Digital Media, Photopaper, Teeshirt Printing Facilities, Digital and Wide Format Printing, Colour Photocopying and Lightbox Transparencies. Currently, we are concentrating on seeking franchisees in the UK, Ireland, Netherlands, Sweden, Germany, Denmark and Spain. We can supply a huge range of products for you, and our aim in particular is to create additional markets for our products. We don't believe in taxing our franchisees too much for the use of trademarks and logos.

Above all, we are very approachable, and willing to talk, and you are very welcome to call us on the listed numbers below, or drop into our upstairs premises in Parnell Place, Cork for a chat. Obviously, we don't want to reveal every detail of this franchise opportunity, but we are confident you will like what you hear!

Phone: +353 21 4222000

Fax: + 353 21 4223888

P.S. If you are calling by phone, please be aware that our store can be very busy at times, but would hope that you be patient with us, as we are still quite short-staffed. We welcome enquiries from anywhere in the world.

"Shockwave" Spin-Dry Centrifuge - Wash Ink Cartridges Clean with our high speed Spin-Drying machine

For HP1823D/6578D/5164I and Compatibles

These color ink cartridges are the most difficult to fill, and often cause color distortion and head block. The general success rate for refilling ink in this type of cartridge may be as low as 10%. To solve this problem, 9to6 technicians carried out further research on these cartridges, and developed a completely new centrifugal spin-drying machine to solve these problems and vastly increase the success rate for regeneration.

9to6 "Alchemy" Model 96-01B - Epson Cartridge Automatic Ink Filling System

Based on EPSON's Black, 3 Color and 5 Color cartridges, this system utilizes a brand-new cartridge-clamp automatic vacuum ink-fill technique. It is no longer necessary to put the fill-head into the ink filling hole: all we need to do is just to clamp the cartridge once, and one button in the system can control the whole ink filling procedure. Simple to operate, it's dimensions are small, roughly about the size of a fax machine. This system especially suits users who get a great amount of printing jobs (e.g. an Advertising Company, Design House etc.) and of course would suit any company or store in the business of compatible ink cartridge manufacturing, refilling, selling and presenting.

9to6 "Emperor" Model 96-03 Intelligent Combined Pressure/Suction Ink Filling Machine

This new durable cartridge clamp ink-fill machine, is a multi functional device designed as a professional ink filling station and cartridge regenerator. Based on the best features of the previous "Maestra" Auto-Fill (Model 96-02A) this machine is also computer controlled, and has an improved power pressure ink filling functionality, combined with long-lived metal clamps which enable positive voltage ink filling through the jet head to become simpler, faster and more clamp living time. This machine is powerful, and is definitely the machine of choice to use in your store.

EPSON Printer Continuous Ink Supply System

This system is aimed at Epson and Canon fission inkjet printers. Providing that there is no damage to the main architecture in the printer body, this system allows you to add a special device which can be fitted to the ink cartridge holder to allow us to refit normal printers in seconds so that they become continuous ink supply printers.
